

**U-\$AVE ON THE RATE:** Pay to install a separately metered off-peak subpanel and receive about a 50 percent reduction for any electricity that runs through the subpanel. (The off-peak meter is installed for free by a co-op employee.) Do not connect anything to the subpanel that cannot have power interrupted to it.

**NOTE:** Adams Electric cannot guarantee the duration or extent of any periods of interruption due to the ever-changing nature of electrical demand on the power grid that provides power to the co-op's substations and metering points. Members participating in the U-shift incentives must understand that periods of interruption can be extended without notice due to unforeseen circumstances on Adams Electric's distribution system and the energy supply grid.

**U-TAKE THE CREDIT:** Have a U-Shift switch installed free of charge on your electric water heater, and/or heat pump or central air unit and receive an ongoing bill credit. This credit is \$10 per month\* for an interruptible water heater. The credit is \$10 per month for the months of June, July and August for interruptible heat pumps or central air units. \*Exclusions may apply.

This U-Shift switch will be installed on your electric water heater or central air unit. This is what the cooperative will communicate with during "shifting" periods.

## SHIFT YOUR ENERGY USE AND \$AVE

The co-op's U-Shift, U-\$ave program moves the use of electric water heaters, heating and cooling systems and other interruptible equipment to off-peak hours. Help reduce expensive demand peaks which take place on the coldest weekday winter days and hottest weekday summer afternoons by joining nearly 10,000 other members shifting their use.

## Learn when the co-op is shifting and saving.

Sign up to receive text or email alerts through your SmartHub account at [adamsec.smarthub.coop](https://adamsec.smarthub.coop).

- Under “Manage Notifications,” select the Shift and \$ave Signal to get an alert when the co-op is projecting an interruption to U-Shift switches.
- Select U-Shift Off Peak Alert to receive a notification specifically for when U-Shift Off-Peak Panels are about to be interrupted.
- Follow the co-op on Facebook and Twitter to learn specific shifting time frames and updates.

# U-Shift, U-\$ave Initiatives

**U-Shift Water Heating** encourages members to allow one free switch to be installed (a \$215-value) on their electric water heaters and earn a monthly bill credit.\* Rebates are offered to members who buy a new water heater and allow a switch to be installed on it. Rebates are also available for those who newly join the program and install a new U-Shift switch on an existing water heater.  
*\*Exclusions may apply.*

**U-Shift Air Conditioning** asks members to allow one free switch to be installed (a \$215-value) on their heat pumps and central air units and earn a bill credit for the months of June, July and August.

**U-Shift Off-Peak Rate** asks members to install a separate subpanel and meter base (at their expense), but then provides about a 50 percent rate reduction for all the electricity that flows through that subpanel.

**Electric Vehicle Incentive:** Connect a Level II electric vehicle to the off-peak panel and receive a one-time \$300 bill credit - plus the nearly 50 percent rate reduction for charging.

**U-Shift, U-\$ave** asks members to turn off major appliances and modify their thermostat temperature on the hottest summer afternoons and coldest winter mornings and evenings. These include dishwashers, and washers and dryers. Members are asked to use the microwave or barbecue grill to cook their meals during those critical hours.
